

High performance diesel engine oil prevent piston from sulfur acid deposit generation and bearing corrosion. Excellent anti-corrosion for cylinder liners and bearing.

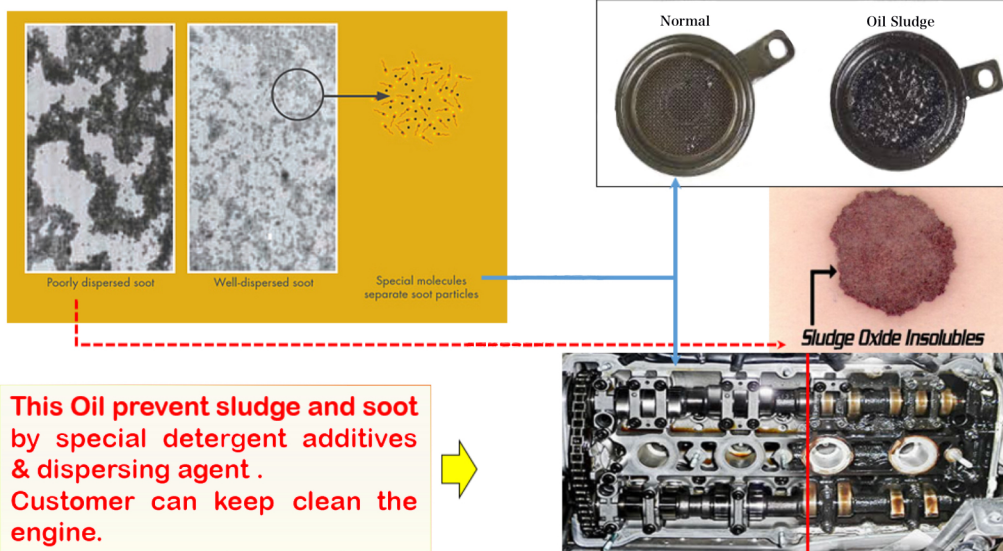

Severe condition in Engine

- Very high temperature by combustion. (Oil pan 80 - 100 °C, max 250 °C in engine)
- High sulfur content in diesel fuel. —> Generate the Sulfur acid deposit.
- Cause corrosive wear to cylinder liner and some bearing.

This engine oil is excellent anti-corrosion property and prevent generate Sulfur acid deposit by special anti wear and detergents additive.

High performance diesel engine oil prevent to generate the sludge deposit and soot at high soot temperature.

This Oil prevent sludge and soot by special detergent additives & dispersing agent. Customer can keep clean the engine.

Soot dispersed (Clean)
