

KOBELCO

SK130 SK140_{LC}

Note: This catalog may contain attachments and optional equipment that are not available in your area. And it may contain photographs of machines with specifications that differ from those of machines sold in your areas. Please consult your nearest KOBELCO distributor for those items you require. Specialist equipment is needed to use this machine in demolition work. Before using it please contact your KOBELCO dealer. Due to our policy of continuous product improvements all designs and specifications are subject to change without advance notice. •

To cities, forests, and all kinds of sites around the world.

machines" construction They increated their power While boars are state-or efficiency. Featuring to to powerfor Their high Kobelco is striving to costs, as we the times.

BEILO

SK130 SK140LC

Kobelco's innovations have created "earth-friendly construction machines" that play important roles at a diverse range of construction sites throughout the world.

They increase productivity on all types of projects thanks to their power, durability, and outstanding fuel efficiency. While boasting low fuel consumption, the SK130 and SK140LC are state-of-the-art machines that achieve even greater efficiency.

Featuring strong durability and easy maintenance, they're put to powerful use on all kinds of construction sites.

Their high performance exceeds expectations.

Kobelco is focused on the future of the global environment, striving to provide greater work efficiency and reduce life-cycle

costs, as well as offering a new sense of value that's ahead of the times.

More operable. Durable. Better performance.

Upper Structure

Cooling System

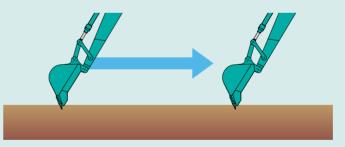

The oil cooler has been changed from a two-layer to a one-layer type. This prevents dust from collecting in the gaps, helping to maintain the cooling function.

Improved Workability

Speedy combined operations

Combined attachment operations, such as horizontal pulling to operate the boom and arm at the same time, are also nimble and smooth, making it possible to work faster.

Travel System

Reinforced Guide Frame

Reinforced guide frame prevents deformation caused by impact or encroaching of loose stones.

Get More Done Faster with Superior Operability

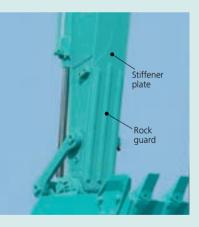

*1 Values are for STD arm (2.38m) *2 Without including height of shoe

Attachment/Equipment

Reinforced Attachments

There is a new long arm. Additionally, rock guard reinforcement can now be attached to the tip.

The shape of the lower plate has been optimized for logging work, and the arm strength is enhanced.

Reinforced Undercover

Reinforced undercover protects the piping and other components from damage caused by accidental contact with branches, debris and other obstacles.

We're always pursuing fuel efficiency.

Efficient maintenance to sustain high performance.

Reduced fuel consumption in ECO-mode

ECO-mode: Engineered for Economy

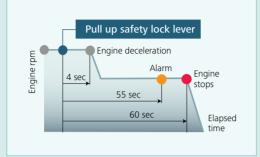

Kobelco's ECO-mode maximizes the operating efficiency of the engine and other components to achieve much greater fuel efficiency. Just press a button to choose the operation mode best suited to the task at hand and the working conditions.

H-mode • • • Maximum power for maximum productivity on your toughest jobs

node ••• Ideal balance of productivity and fuel efficiency for a range of urban engineering projects

ECO-mode • • • Minimum fuel consumption for utility projects and other work that demands precision

Hydraulic system engineered to reduce energy loss

Kobelco' s proprietary hydraulic systems offer hydraulic line positioning that reduces friction resistance and valves designed for higher efficiency, minimizing energy loss throughout the system

Operator-friendly Features Include Controls that Are Easy to See, Easy to Use

Multi-Display in Color Brilliant colors and graphic displays are easy to recognize on the LCD multi-display in the console. The display shows fuel consumption, maintenance intervals, and more.

1 Analog gauge provides an intuitive reading of fuel level and engine water temperature

- 2 Green indicator light shows low fuel consumption during operation
- Fuel consumption/Switch indicator for rear camera images
- 4 Digging mode switch
- 6 Monitor display switch

One-Touch Attachment Mode Switch

A simple touch of a button, switches the hydraulic circuit and flow amount to match attachment changes. Icons help the operator to confirm the proper configuration at a glance.

Can Be Done from Ground Level The layout allows for easy access from the ground for many daily checks and regular maintenance tasks.

(Auto Idle Stop) If the safety lock lever is lifted up, the engine will stop automatically. This eliminates wasteful idling during standby, saving fuel and reducing CO₂ emissions as well.

AIS

Maintenance Work, Daily Checks, Etc.,

Simple layout for easy access to radiator and cooling system elements

An enlarged cartridge-type pilot filter simplifies maintenance.

Easy Cleaning

More Efficient Maintenance Inside the Cab

Internal and external air conditioner filters can be easily removed without tools for cleaning.

Detachable two-piece floor mat with handles for easy removal. A floor drain is located under floor mat.

Compatible with Biofuel

Biofuel may be used with Kobelco machinery, reducing environmental impact and supporting business. *For more information about using biofuels, please contact the nearest dealer.

Machine Information Display Function

- Displays only the maintenance information that's needed, when it's needed
 Self-diagnostic function provides early-warning detection and display of electrical system
- Service-diagnostic function makes it easier to check the status of the machine
 Record function of previous breakdowns
- including irregular and transient malfunction

Replacemer

cycle:

1,000

hours

Long-Interval Maintenance

Long-life hydraulic oil reduces cost and labor.

The high-capacity hydraulic oil filter incorporates glass fiber with superior cleaning power and durability.

the cab floor free of mud, simplify cleaning

Floor mat's raised edges help keep Engine oil pan equipped with drain valve.

Comfortable Cab Is Now Safer than Ever.

A work environment that is quieter and more comfortable. A cab that puts the operator first is key to improved safety.

IIIII

*Prevention bar shall be equipped on the right side window.

Comfort

Super-Airtight Cab

The high level of air-tightness keeps dust out of the cab.

Quiet Inside

The high level of air-tightness ensures a quiet, comfortable cabin interior.

Low Vibration

Coil springs absorb small vibrations, and high suspension mounts filled with silicone oil reduce heavy vibration. The long stroke achieved by this system provides excellent protection from vibration.

Anti-theft measures

Theft-prevention brackets have been installed on the ECU, mechatronics, and cluster panels. Their structure makes removal very difficult.

Broad View Liberates the Operator

The front window features one large piece of glass without a center pillar on the right side for a wide, unobstructed view

Air Conditioner Louvers behind the Seat

The large air-conditioner has louvers on the back pillars that blow from behind and to the right and left of the operator's seat. They can be adjusted to put a direct flow of cool/warm air on the operator, which means a more comfortable operating environment.

*Prevention bar shall be equipped on the right side window.

Safety

ROPS Cab

ROPS (Roll-Over-Protective Structure)-compliant cab clears ISO standards (ISO-12117-2: 2008) and ensures greater safety for the operator should the machine tip over.

Standard 3 LED Lights Bright LED lights ensure visibility even during night work. (one for boom, one for right storage box, and one for Cab)

More Comfortable Seat Means Higher Productivity

Large Cab Is Easy to Get in and Out of

The expanded cab provides plenty of room for a large door, more headroom and smoother entry and exit.

*Armrests are equipped with suspension seats only.

Interior Equipment Adds to Comfort and Convenience

Expanded Field of View for Greater Safety

Greater safety assured by rearview mirrors on left and right.

Hammer for emergency exit

KOMEXS KOBELCO MONITORING EXCAVATOR SYSTEM

When a hydraulic excavator is fitted with this system, data on the machine's operation, such as operating hours, location, fuel consumption, and maintenance status can be obtained remotely.

Direct Access to Operational Status

Location Data

•Accurate location data can be obtained even from sites where communications are difficult.

Operating Hours

Fuel Consumption Data •Data on fuel consumption and idling times can be

•A comparison of operating times of machines at multiple locations shows which locations are busier and more profitable.

· Operating hours on site can be accurately recorded, for running time calculations needed for rental machines, etc.

Notes

13

- Do not attempt to lift or hold any load that is greater than these lift capacities at their specified lift point radius and heights. Weight of all accessories must be deducted from the above lift
- capacities.2. Lift capacities are based on machine standing on level, firm, and uniform ground. User must make allowance for job conditions such as soft or uneven ground, out of level conditions, side loads, sudden stopping of loads, hazardous conditions, experience of personnel, etc. 3. Arm top defined as lift point.

- 4. The above lift capacities are in compliance with ISO 10567. They do not exceed 87% of hydraulic lift capacity or 75% of tipping load. Lift capacities marked with an asterisk (*) are limited by hydraulic capacity rather than tipping load. 5. Operator should be fully acquainted with the Operator's and Maintenance Instructions before
- operating this machine. Rules for safe operation of equipment should be adhered to at all times.
- Lift capacities apply to only machine originally manufactured and normally equipped by KOBELCO CONSTRUCTION MACHINERY CO., LTD.

STANDARD EQUIPMENT

ENGINE

- Engine, ISUZU 4JJ1,
- diesel engine with turbocharger and intercooler
- Automatic engine deceleration
- Auto Idle Stop (AIS)
- Batteries (2 x 12 V 100 Ah)
- Starting motor (24 V 4 kW), 50 amp alternator
- Engine oil pan drain cock
- Double element air cleaner
- CONTROL
- Working mode selector (H-mode, S-mode and ECO-mode)
- SWING SYSTEM & TRAVEL SYSTEM
- Swing rebound prevention system
- Straight propel system
- Two-speed travel with automatic shift down
- Sealed & lubricated track links
- Grease-type track adjusters
- Automatic swing brake
- HYDRAULIC
- Arm regeneration system
- Aluminum hydraulic oil cooler
- MIRRORS & LIGHTS
- Two rear view mirrors
- Three front working LED lights
- (one for boom, one for right storage box, and one for Cab)

OPTIONAL EQUIPMENT

- Two cab LED lights
- Rearview camera
- N & B piping
- Wide range of buckets

Note: Standard and optional equipment may vary. Consult your KOBELCO dealer for specifics.

CAB & CONTROL

- Two control levers, pilot-operated
- Horn, electric
- Cab light (interior)
- Luggage tray
- Large cup holder
- Detachable two-piece floor mat
- Handrails
- Intermittent windshield wiper with double-spray washer
- Skylight
- Tinted safety glass
- Pull-up type front window and removable lower front window
- Easy-to-read multi-display color monitor
- Automatic air conditioner
- Emergency escape hammer
- KOMEXS

Various optional arms

- Wide range of shoes
- Multi control valve
- Suspension seat with armrest
